

Install Mattermost with Docker

This will install:

- Docker
- Docker Compose
- PostgreSQL (inside Docker)
- Mattermost
- Persistent storage
- Mattermost Calls plugin support (can be enabled later)

Path : <http://5.160.64.210:8065/kitco/threads>

Compose.yml script : \\tns\Infrastructure\Network Configurations and Plans\Subsidiaries\KITCO\LAB\Mattermost

1. Update Ubuntu

```
sudo apt update
sudo apt upgrade -y
```

2. Install Docker

```
sudo apt install docker.io docker-compose-v2 git -y
```

Enable Docker:

```
sudo systemctl enable --now docker
```

Verify:

```
docker --version
docker compose version
```

Docker Compose v2 is the current supported Compose implementation.

3. Download the Official Mattermost Docker Deployment

```
cd ~
```

```
git clone https://github.com/mattermost/docker
```

```
cd docker
```

This is Mattermost's official Docker deployment repository.

4. Create the Environment File

```
cp env.example .env
```

Edit:

Install Mattermost with Docker

nano .env

Find:

DOMAIN=

Change it.

Example for a local server:

DOMAIN=172.17.90.208

Example with a domain:

DOMAIN=Kayson-imp.com

Save:

CTRL+O

ENTER

CTRL+X

Mattermost requires the DOMAIN value to be configured.

5. Create Storage Directories

```
mkdir -p ./volumes/app/mattermost/{config,data,logs,plugins,client/plugins,bleve-indexes}
```

Set permissions:

```
sudo chown -R 2000:2000 ./volumes/app/mattermost
```

6. Start Mattermost

For a simple installation without NGINX:

```
docker compose \
-f docker-compose.yml \
-f docker-compose.without-nginx.yml \
up -d
```

Docker Compose will automatically start:

- Mattermost container
 - PostgreSQL container
-

7. Check Containers

```
docker ps
```

You should see something similar to:

```
mattermost
postgres
```

8. Watch Logs

Install Mattermost with Docker

If needed:

`docker compose logs -f`

Stop with:

`CTRL+C`

9. Open Firewall

`sudo ufw allow 8065/tcp`

Verify:

`sudo ufw status`

10. Open Mattermost

On the same machine:

`http://localhost:8065`

From another device:

`http://YOUR_SERVER_IP:8065`

Example:

`http://192.168.1.100:8065`

11. Create the Admin Account

The first page should be:

Create your account

Create:

- Email
- Username
- Password

The first account automatically becomes the System Administrator.

12. Verify Everything Works

`docker ps`

Check logs:

`docker compose logs --tail=50`

Useful Commands

Install Mattermost with Docker

Restart Mattermost:

```
docker compose restart
```

Stop Mattermost:

```
docker compose down
```

Start Again:

```
docker compose up -d
```

See logs:

```
docker compose logs -f
```

Enable Voice Calls

After logging in:

1. Menu → **System Console**
2. **Plugins**
3. **Plugin Management**
4. Enable **Calls**
5. Save

Mattermost Calls provides voice calling and screen sharing support.

If anything fails, run:

```
docker ps
```

```
docker compose logs --tail=100
```
